- TECHNICAL SUPPORT.**
- CAMO SERVICES.**
- AVIATION CONSULTANCY.**
- AIRCRAFT SALE AND PURCHASE SERVICES.**
- AIRCRAFT LEASE SERVICES.**
- AIRCRAFT PARTS SALE SERVICES.**

- AIRCRAFT INSPECTION AND ASSESSMENT

SkyLight Aviation Services delivers end-to-end aircraft inspection and assessment services that equip owners, buyers, and operators with clear, accurate, and decision-ready technical insight. From pre-purchase and lease-transition evaluations to full structural, systems, and engine condition assessments, we provide the complete technical picture needed to safeguard asset value and reduce acquisition or transition risk. Our team manages the entire process—technical audits, borescope coordination, valuation support, delivery/redelivery oversight, and acceptance representation—ensuring every decision is informed, compliant, and commercially sound.

- TECHNICAL SUPPORT.

Skylight Aviation Services provides focused technical support designed to enhance aircraft reliability and maintain continuous airworthiness. We deliver AOG response, troubleshooting assistance, engineering analysis, documentation review, and parts sourcing guidance to help operators resolve technical issues quickly and in full regulatory conformity.

- CAMO SERVICES .

At Skylight Aviation Services, our CAMO capabilities are built on rigorous technical standards and a deep understanding of international airworthiness frameworks. We ensure that every aircraft under our management remains fully compliant, operationally efficient, and continuously monitored against regulatory, manufacturer, and operator requirements. Our team oversees the full spectrum of continuing airworthiness activities—from records integrity and maintenance forecasting to regulatory liaison and reliability analysis—providing operators with a seamless, compliant, and data-driven airworthiness management solution.

- Full CAMO Management
- Airworthiness Review & Compliance Monitoring
- Aircraft Technical Records Management
- Maintenance Planning & Forecasting
- MEL/CDL Development
- Reliability Program Development
- Liaison with Civil Aviation Authorities
- Airworthiness Directives (ADs) & Service Bulletin (SB) Compliance Tracking

- AVIATION CONSULTANCY.

Skylight Aviation Services provides integrated consultancy services focused on establishing compliant, audit-ready operational systems for operators and new AOC applicants. Our expertise spans AOC certification pathways, regulatory interface, safety and quality system architecture, and the development of operational documentation required under international aviation standards. We strengthen operator readiness, streamline regulatory approvals, and ensure continuous conformity with EASA, FAA and CARC requirements.

- AOC
- AOC Certification & Document Package Preparation
- Safety & Quality Management System (SMS/QMS) Advisory
- Regulatory Coordination & CAA Liaison
- Operational Compliance Frameworks & Conformity Mapping
- Operational Manuals Development: OMM, SOPs, CAME, MOE
